Szrek2Solutions

Press Release

Szrek2Solutions' Trusted Draw™ and Trusted Audit™ Systems Selected by Iowa Lottery

Feb 2016, RI, USA - Szrek2Solutions announced that it has been selected by the Iowa Lottery Authority to provide equipment that will be used for the Lottery's drawings.

Szrek2Solutions signed a license and service agreement with Iowa Lottery to deliver Trusted Draw™ and Trusted Audit™ Systems as well as technical support services to ensure secure and transparent electronic drawings for the Iowa Lottery.

Iowa Lottery CEO Terry Rich said that the Lottery took note of the ease with which it could interface with Szrek2Solutions' equipment as well as the reporting features that the equipment provided. "Szrek2Solutions' proposal aligned well with the details in the Lottery's request for proposals for drawing equipment," Rich said.

The Trusted Draw™ System will be used by the Lottery to select winners in its Play It Again® promotional drawings. Before each draw, second-chance ticket and player information will be entered into the Trusted Draw™ System which will generate draw outcomes. The draw technology used allows for the verification of draw integrity by the independent Trusted Audit™ System.

Szrek2Solutions is providing the Lottery with a secure and reliable platform for random numbers generation (RNG) for drawings in lottery and raffle games, utilizing its unique patented RNG method with fraud detection. Based on the asymmetric properties of digital signatures, where a private key is used as a random number seed and derivative random numbers are verified using the public key, the method gives lotteries full transparency for the draw process. All generated numbers are random, unbiased, and cannot be predicted. For digital signing, Trusted Draw™ uses a tamper evident NIST certified HSM (Hardware Security Module), which ensures ultimate RNG security with the confirmation of every draw, its time, the generated numbers, and the hardware used for the draw.

The Szrek2Solutions' RNG has been certified by several independent U.S. and international labs and has been used successfully since 2005 by numerous lottery operators and state licensed lotteries in the world, including Danske Spil in Denmark, Lottomatica and Sisal in Italy, Texas Lottery, Oregon Lottery and IGT in the United States and in Europe.

In addition to Trusted Draw™ and Trusted Audit™, Szrek2Solution's Product Suite includes also Trusted Play™, a high performance RNG server for generating outcomes for e-instant games and multiplayer games, Trusted Transactions™ for securing lottery transactions, and Trusted Ticket™ for authenticating lottery tickets.

Szrek2Solutions LLC is a private, international product and service supplier based in Rhode Island, USA, dedicated to providing secure solutions for the gaming industry. For more information, please visit www.szrek.com.
