Press Release

Szrek2Solutions to Supply Trusted Draw™ for the
Kansas Lottery Raffle

East Greenwich, RI, October 2009: Szrek2Solutions LLC announced that it will supply its Trusted Draw™ secure electronic draw system to the Kansas Lottery. Trusted Draw™ will be used to select winners for the Kansas Lottery Holiday Millionaire Raffle game.

The Trusted Draw™ system supports multiple games and offers a rich selection of available features. For raffle and second-chance win games, it allows selecting draw numbers from very large ranges (up to 1 billion) and supports very high number of prizes (over 100,000). Lotteries can use the same draw system for future raffle games or other game types and be fully confident in the winning results – Trusted Draw™ has a 100% reliability record and has never failed in its operation.

Trusted Draw system works stand-alone or connected to gaming system, providing a high degree of automation. It offers optional built-in animated draw presentation and audit function providing the draw process exceptional security – based on mathematical proof of draw transparency and integrity.

Trusted Draw™ is a part of *Trusted* product suite, based on S2S's secure RNG platform, generating non-biased auditable random numbers for all games of chance, ensuring transparency for drawing and betting. Combined with its audit capability, the RNG platform can detect and prevent insider fraud. The RNG and audit methods have been patented in the U.S. and internationally and the RNG has been certified by several laboratories including Gaming Laboratories Inc (GLI) and Technical Systems Testing (TST). The RNG platform is field proven since 2005, generating hundreds of thousands of verified random numbers daily, having been used by major lottery game operators and providers, such as Danske Spil of Denmark, Lottomatica, Italy, South Carolina Educational Lottery, and Florida State Lottery.

Szrek2Solutions (www.szrek.com) is a private, international consultancy and product design firm specializing in secure software systems solutions for the gaming industry. Headquartered in East Greenwich, RI, USA, Szrek2Solutions offers a suite of *Trusted* products including Trusted Play™, an instant bet generation system, Trusted Draw™, an electronic draw system, Trusted Transactions™, a transaction security and integrity subsystem and Trusted Ticket™, a ticket authentication subsystem.
