Press Release

Szrek2Solutions to Provide Trusted Draw™ and Trusted Audit™ for BIGABOOM company in Russia

East Greenwich, RI, July 2011: Szrek2Solutions LLC (S2S) announced that it has entered into a five-year agreement with BIGABOOM, a Russian state-licensed gaming company, to provide its Trusted Draw™ system platform and related services. To ensure secure selection of winners and allow verifying integrity of draws for BIGABOOM games, S2S will be providing its Trusted Draw™, Trusted Audit™ and Trusted Monitor™ products, which offer most advanced secure RNG technology on the market.

S2S's Trusted Draw™, secure electronic draw platform, will be connected to the BIGABOOM gaming system, providing high degree of automation for the draw process and time-stamping of wagers. In addition to standard draws, it will perform 'raffle style' draws, which will guarantee jackpot winners for variety of games including lotto. S2S will offer also its Trusted Audit™ function providing the draw process its exceptional security - based on mathematical proof of draw transparency and integrity. Automated internal control functions will perform winner selection, prize calculation and verification of game totals and individual winnings with the BIGABOOM gaming system.

For the first time S2S will offer functionality to initiate draws and audit of draws remotely which will be essential to support BIGABOOM's TV draw program. The speed of the draw and winner selection process will provide viewers with the excitement of witnessing real-time draw.

Trusted Draw™ generates non-biased auditable random™ numbers for lotto, raffle and other games of chance. Combined with its audit capability, Trusted Draw™ platform allows detecting insider fraud. The RNG and audit methods used by S2S have been patented in the U.S. and internationally and the RNG has been certified by several labs including GLI and TST. The RNG platform is field proven since 2005, generating hundreds of thousands of verified random numbers daily. The audit platform mathematically proves integrity of random numbers and associated game data.

S2S's RNG platform includes also a Trusted Play™ product, a high performance RNG server generating outcomes for e-instant games and multiplayer games, for wide range of gaming products and environments. Other S2S's products include Trusted Transactions™, securing lottery transactions, Trusted Ticket™, authenticating lottery tickets, and companion products: Trusted Audit™ providing integrity verification and audit, Trusted Monitor™, allowing remote monitoring of RNG and audit processes and reporting.
