## Szrek2Solutions to Provide Trusted Draw™ to Comset

Szrek2Solutions will provide its secure electronic Trusted Draw and Audit system with innovative Random Number Generator (RNG) to Comset Services Ltd for their loyalty draw

**East Greenwich, RI, October 11, 2006:** Szrek2Solutions LLC announces the signing of a license and services agreement with Comset Services Ltd, calling for the implementation of a Trusted Draw™ system. This secure electronic draw and audit system offers the most advanced random number security available to the gaming industry. Trusted Draw™ will be used in conjunction with the loyalty draw to be launched by Comset in Pakistan this fall. Comset will use the audit functionality in Trusted Draw to verify the integrity of the draw and to detect any potential fraud.

Comset indicated that it had selected Szrek2Solutions and Trusted Draw primarily for reasons of the technical advantages of the RNG solution and its reliability and system integrity. The Trusted Draw solution fulfills the technical goals of Comset's program and is a good fit for the new draw.

Szrek2Solutions believes the implementation of Trusted Draw by Comset represents a milestone in the gaming industry for RNG – the full control over generated draw outcomes, with the ability to detect and prove any potential fraud. Trusted Draw™ offers a unique feature of audit of random numbers based on RUN+A (Random Unpredictable Numbers with Audit) methodology, patented by Szrek2Solutions, utilizing asymmetric encryption technology (public/private key) to digitally sign draw data and produce a unique random number set. The digital signature used in the process can be “decoded” at any later point in time to recreate and verify both the number set and the related draw data.

Trusted Draw™ has potential applications as a draw system for a wide range of games, including traditional games, raffles, lotto, numbers, keno, bingo, cards and monitor games. Trusted Draw can be used in conjunction with a wide range of betting platforms, including conventional lottery terminals, video lottery terminals, and internet and mobile phone wagering. Trusted Draw and its sister product, Trusted Play, are currently used by the Danish Lottery - Danske Spil (previously Dansk Tipstjeneste) and by Chariot PLC of the UK.

Szrek2Solutions ([www.szrek.com](http://www.szrek.com)) is a private, international consultancy and product design firm specializing in secure software systems solutions for the gaming industry. Headquartered in East Greenwich, RI, USA, Szrek2Solutions offers a family of secure products including Trusted Play™, an instant bet generation and audit system, Trusted Draw™, an electronic draw system with audit, ICS (internal control system), and graphics animation.

Comset Services Ltd is a technology based Marketing and Distribution firm incorporated in the Jebel Ali offshore Zone UAE. It is managed entirely by a blend of European and Pakistani professionals, and its key operations are currently in Pakistan with over 100 employees. It has the sole license to manage the Hero Pakistani brand on behalf of the Pakistan Sports Trust. Hero Pakistani is a brand of collector's cards with a Loyalty Scheme that holds weekly draw for a minimum jackpot prize of Rs. 10,000,000. The primary objective of this product is to raise funds for the development of sports in Pakistan.
